Professional Summary

Frontend Developer with 1+ years of experience designing and shipping web applications using React.js, Next.js, and TypeScript at Codeaegis, alongside independent full-stack projects spanning workflow management and real-time messaging systems. Delivered 5+ live applications, improved Lighthouse performance scores by 25–30% through code-splitting and server-side rendering, and reduced API response latency by 20% through caching strategies. Experienced in component-driven architecture, Redux state management, REST API integration, and Agile/Scrum collaboration with cross-functional teams.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, C++, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Tailwind CSS, WebSockets, Responsive Web Design

Backend: Node.js, Express.js, REST API Design

Databases: MongoDB, MySQL

Tools & Practices: Git, GitHub, Vercel, AWS (basic), VS Code

Professional Experience

Frontend Developer, Codeaegis

Feb 2025 – Present

React.js / Next.js Developer

Noida, India

- Developed and deployed 5+ admin dashboards for production use (including for fantasy sports platforms), enabling internal teams to manage users, content, and application data.
- Improved average Lighthouse performance score by 25–30% via route-based code-splitting, lazy loading, and server-side rendering (SSR).
- Reduced API response latency by approximately 20% by introducing caching strategies for frequently accessed dashboard data on high-traffic REST endpoints.
- Managed shared application state (dashboard records, filters, and live WebSocket-driven updates) using Redux, replacing prop drilling and reducing redundant re-renders.
- Engineered a live, WebSocket-powered monitoring dashboard for one project, pushing instant data updates to the UI without manual refresh.
- Collaborated with designers and backend engineers in Agile/Scrum sprints; performed code reviews and enforced Git branching conventions.

React.js Intern, Codeaegis

Nov 2024 – Jan 2025

Noida, India

- Created reusable UI components in React.js and Tailwind CSS following component-based architecture standards.
- Implemented forms, dashboards, and REST API integrations for an internal admin dashboard, incorporating senior engineer code review feedback.

Key Projects

Adar — Property Maintenance Management Platform

React.js, Redux, Axios, Tailwind CSS, Firebase, Node.js, Express.js, Sequelize, MySQL, REST APIs, JWT

- Architected a role-based property maintenance platform supporting five workflows (Admin, Supervisor, Technician, Cleaner, Customer) with JWT-secured REST APIs.
- Designed the maintenance request lifecycle: creation, Cleaner assignment, status tracking, completion, and customer ratings.
- Integrated Firebase real-time chat and FCM push notifications with environment-isolated dev/production channels.

Real-Time Messenger App

Next.js, MongoDB, WebSockets, NextAuth

- Delivered a WebSocket-based messaging platform supporting 100+ concurrent users with instant message delivery.
- Established authentication and role-based access control with NextAuth/JWT; optimized database queries to cut overhead by approximately 15%.

ClickShop – E-commerce Platform

React.js, Tailwind CSS, JavaScript

- Launched a responsive e-commerce storefront with a dynamic cart, live product filtering, and real-time inventory updates.
- Reduced page load time by approximately 35% through code-splitting and lazy rendering of product images and routes.

Education

Ajay Kumar Garg Engineering College, AKTU

2021 – 2025

B.Tech, Computer Science and Engineering – CGPA: 7.25

Ghaziabad, UP

Certifications

DSA Masterclass – CodeHelp | Web Development Bootcamp – Udemy | OpenAI GPT-3 for Developers – Infosys Springboard
